Summary

Results-driven IT graduate (2025) with a strong foundation in Python, Machine Learning, and SQL. Skilled in building automated tools and predictive models through internships and academic projects. Excellent problem-solving skills and highly adaptable to remote work environments, with a focus on delivering efficient, technology-driven solutions.

Work Experience

Python Developer Intern – CodeSpeedy Technology Pvt Ltd Jun 2024 – July 2024

Tech Stack: Python, Tkinter, PyMuPDF, VS Code

- Designed interactive desktop apps using **Tkinter**, including a Bill Calculator and PDF-to-Image converter, improving task completion speed for end users and reducing manual effort.
- Developed Python scripts to automate tasks like rotating PDF pages and converting documents into images.
- Implemented robust error handling with **try-except** blocks to manage user input errors, preventing application crashes and improving user experience.

Projects

Towards High Accuracy Solar Cell Defect Classification using Modified YOLOv5 Jan 2025 – Mar 2025

Tech Stack: Python, YOLOv5, PyTorch, NumPy, Matplotlib, OpenCV

- Engineered an automated Computer Vision system using **Python** and **YOLOv5** to classify solar cell defects, achieving a significant accuracy boost from **91% to 97%**.
- Conducted rigorous **Attention to Detail** in data augmentation and hyperparameter tuning to eliminate false negatives in defect detection.
- Automated the image processing pipeline for 1,000+ images, reducing manual inspection time by **60%**, demonstrating strong **Planning and Time Management** skills in project execution.

Predicting Student Success in Online Learning Environment using Machine Learning Sep 2024 – Nov 2024

Tech Stack: Python, Scikit-learn, Pandas, Seaborn, Random Forest, Gradient Boosting

- Developed a Predictive Analytics model using **Machine Learning (Random Forest/Gradient Boosting)** to forecast student trends with **96% accuracy**.
- **Collaborated with a multi-disciplinary team** to conduct Feature Engineering, effectively communicating complex data insights to identify key performance drivers like assignment metrics.
- Isolated critical performance indicators through Correlation Analysis, showcasing a **Problem-Solving** approach to improve student retention in digital environments.

Education

2021 - 2025	Malla Reddy engineering College for Women (B.Tech)	8.56
2019 - 2021	New Vision Junior College (Class XII)	91.4 %
2018 - 2019	R. R High School (Class X)	9.8

Certifications

Cisco Python Programming Essentials
AWS Fundamentals – Coursera
Cambridge English Empower Level C1 Course

Skills

Programming Languages: Python, Java, C
Web Technologies : HTML, CSS
Database & Tools : MySQL, Microsoft Excel, Power BI, Pandas, NumPy, Git, GitHub, VS Code
Core Concepts : Data Structures, Object-Oriented Programming (OOP), Machine Learning, Data Visualization Techniques
Languages Known : English, Telugu
